

## Teale Fenning Medical Education

### The Essay Practice Course

*The Essay Practice Course* is a new weekend course aimed solely at the short answer question papers. The course concentrates on maximising your score in the Short Answer Papers and we are confident that you will see ***an improvement in your essays*** by the end of the weekend.

We achieve this through our very own ***unique style and approach*** to essay writing which is focused on point scoring. Following years of analysis of marking schemes we have formulated several techniques which ***guarantee you more marks*** and a better chance of passing. You will be provided with detailed marking schemes for all of the questions covered throughout the weekend.

The course is carefully structured to examine each and every type of question that you may face so that you are not surprised on the day of the real exam. The intensive format includes one session on ***Obstetrics***, one on ***Gynaecology***, and one on those difficult ***Quality of Care Topics*** such as audit, risk management, prevention, service provision and so on. The final session will be an ***Open Forum***, where we will answer any question you want and provide you with our very own ***Hot Topic Predictions***.

The course will teach you how to analyse a question, plan your answer and then structure your essay with the focus on making as many points as you can. We also show you how to express yourself and how to phrase your answer but again with the emphasis on maximum point scoring. Whilst the course is aimed at ex-Teale Fenning delegates who have attended our Essay Writing Technique Course it is open, and applicable, to all Part II candidates.
